

Square Wrap (4")

FT-1020TPO **TPO**

FT-1020PVC **PVC**

DESCRIPTION

A prefabricated flashing that seals square roof penetrations — square tubes, posts, rails and similar shapes — on single-ply membrane roofs. The molded square sleeve fits over the penetration and the integral membrane skirt heat-welds to the field sheet for a watertight seal. A split version installs over an existing penetration without disassembling it.

FEATURES

- Seals square penetrations a round boot can't fit
- Factory-welded for consistent quality and fast installation
- Integral membrane skirt heat-welds to the roof
- Available in TPO or PVC
- 4" and 6" sizes; split versions available for retrofit

SPECIFICATIONS

Nominal size	4 in square
Membrane	TPO or PVC (60 mil)
Clamp	Stainless steel
Other sizes	6", split versions
Unit	Each

Membrane compatibility: Square penetrations on TPO and PVC single-ply roofs.
