

T-Top Vent (4")

- FTT-1001TPO TPO
- FTT-1001PVC PVC

DESCRIPTION

A low-profile passive vent for single-ply roofs. The T-shaped head lets air move out of the roof assembly while its downturned openings keep out rain, and the membrane-clad base heat-welds to the field sheet for a watertight seal. Commonly used to vent plumbing stacks and relieve trapped moisture.

FEATURES

- Passive venting — no power required
- Low-profile T-head sheds rain while venting
- Membrane-clad base heat-welds to TPO or PVC
- 4" nominal; 6", 8" and 4×12 rectangular also available
- Ideal for plumbing stacks and moisture relief

SPECIFICATIONS

Nominal size	4 in
Base	Membrane-clad (TPO / PVC)
Other sizes	6", 8", 4×12 rect.
Unit	Each

Membrane compatibility: Passive venting / stack venting on TPO and PVC single-ply roofs.
