

Bowl Drain (3")

- FT-1037 TPO
- FT-1040 PVC

DESCRIPTION

A prefabricated roof drain with a membrane-clad flange for direct heat-welding into single-ply roofs. The molded bowl guides water into a 3" outlet hub, and the wide clad flange integrates with the field membrane for a watertight connection at the drain. Copper and stainless-steel bodies, side-outlet, and integral-overflow versions are also available.

FEATURES

- 3" outlet hub
- Membrane-clad flange heat-welds to TPO or PVC
- Smooth molded bowl for efficient flow
- Offered in 2", 3", and 4" outlets
- Overflow and side-outlet configurations available

SPECIFICATIONS

Outlet	3 in hub
Flange	Membrane-clad (TPO / PVC)
Body options	TPO, PVC, copper, stainless
Unit	Each

Membrane compatibility: Interior roof drainage on TPO and PVC single-ply systems.
