

Conical Pipe Boot (1–6")

FT-1001TPO **TPO**

FT-1001PVC **PVC**

DESCRIPTION

A prefabricated, factory-welded flashing that seals round penetrations on single-ply membrane roofs. The tapered cone fits a wide range of pipe diameters from a single part, and the integral membrane skirt heat-welds to the field sheet for a permanent, watertight seal. The top of the boot is trimmed to the pipe and secured with a stainless clamp.

FEATURES

- One boot fits pipe diameters from 1" to 6"
- Factory-welded for consistent quality and faster installation than field-built flashings
- Integral membrane skirt heat-welds to the roof
- Available in TPO or PVC
- Split version available for retrofit over existing pipes; larger 6–8" and 8–10" cones also offered

SPECIFICATIONS

Pipe range	1" – 6"
Membrane	TPO or PVC (60 mil)
Clamp	Stainless steel
Unit	Each

Membrane compatibility: Round pipe penetrations on TPO and PVC single-ply roofs.
