

Gravity Vent (12")

FTG-1001TPO **TPO**

FTG-1001PVC **PVC**

DESCRIPTION

A passive roof vent that relieves trapped heat and moisture from the roof assembly without mechanical power. The membrane-clad base heat-welds to the field sheet for a watertight seal, and the hooded head allows continuous airflow while shedding rain and debris. Offered in nominal sizes from 12" to 24".

FEATURES

- Passive ventilation — no power required
- Membrane-clad base heat-welds to TPO or PVC
- Weather-hooded head resists rain and debris
- 12" nominal; sizes to 24" available
- Helps manage condensation in the roof assembly

SPECIFICATIONS

Nominal size	12 in
Base	Membrane-clad (TPO / PVC)
Size range	12" – 24"
Unit	Each

Membrane compatibility: Passive venting on TPO and PVC single-ply roofs.
