

Sealant Pocket (4")

FTP-1005TPO **TPO**

FTP-1005PVC **PVC**

DESCRIPTION

A prefabricated pitch pan for flashing irregular, clustered, or odd-shaped penetrations that cannot be sealed with a standard boot. The membrane-clad base heat-welds to the roof, and the open pocket is filled on-site with pourable sealant around the penetration to complete a watertight seal.

FEATURES

- For irregular or multiple penetrations
- Membrane-clad base heat-welds to TPO or PVC
- Field-filled with pourable sealant
- 4" size; 6" and 8" also available
- A reliable option where a molded boot won't fit

SPECIFICATIONS

Size	4 in
Base	Membrane-clad (TPO / PVC)
Other sizes	6", 8"
Unit	Each

Membrane compatibility: Irregular penetrations on TPO and PVC single-ply roofs.
